## Monthly (December 2011) and Annual (2011) Climate Summary

$\diamond$ Mean temperatures during December and annual were below-normal nationwide.
$\diamond$ Monthly precipitation in December ( 17.6 mm ) was below-normal (34\%) but annual precipitation in 2011 ( 1307.7 mm ) was above-normal ( $24 \%$ ) nationwide.
$\square$ Climate features of December 2011, the 2011 climate, and their long-term trends are analyzed using 45 meteorological stations in Korea (average of the mainland) during 1973-2011 (1908-2011 for Seoul).
※ Normal: average from 1981 to 2010.
※ National average indicates average values of 45 meteorological stations starting from 1973.
※ In Seoul, data are analyzed from 1908.
$\square$ The climatological features in December 2011 can be described as follows:
o Korea (whole nation)

- The mean temperature $\left(0.7{ }^{\circ} \mathrm{C}\right)$, the mean maximum temperature $\left(5.5{ }^{\circ} \mathrm{C}\right)$ and the mean minimum temperature $\left(-3.6{ }^{\circ} \mathrm{C}\right)$ were $0.8{ }^{\circ} \mathrm{C}, 1.5{ }^{\circ} \mathrm{C}$ and $0.4{ }^{\circ} \mathrm{C}$ below-normal, respectively.
- The monthly average amount of precipitation ( 17.6 mm ) was $66 \%$ of normal.
- The monthly average of rainy days ( 6.3 days) was 0.3 days smaller than that of the normal.
- The monthly average of sunshine duration (172.6 hours) was $102 \%$ of normal.

## o Seoul

- The mean temperature $\left(-0.9{ }^{\circ} \mathrm{C}\right)$, the mean maximum temperature $\left(2.9{ }^{\circ} \mathrm{C}\right)$ and the mean minimum temperature $\left(-4.1{ }^{\circ} \mathrm{C}\right)$ were $1.3{ }^{\circ} \mathrm{C}, 1.4{ }^{\circ} \mathrm{C}$ and $0.9{ }^{\circ} \mathrm{C}$ below-normal, respectively.
- The monthly precipitation ( 7.1 mm ) was $33 \%$ of normal.
- The number of rainy days ( 6.0 days) was 1.4 days smaller than that of normal.
- The total of sunshine duration (195.6 hours) was $128 \%$ of normal.

## $\square$ The climatological characteristics of 2011 were as follows:

o Korea (whole nation)

- The mean temperature $\left(12.4{ }^{\circ} \mathrm{C}\right)$, the mean maximum temperature $\left(17.7{ }^{\circ} \mathrm{C}\right)$ were $0.1{ }^{\circ} \mathrm{C}, 0.4{ }^{\circ} \mathrm{C}$ below-normal, respectively. and the mean minimum temperature ( $7.8{ }^{\circ} \mathrm{C}$ ) was $0.1{ }^{\circ} \mathrm{C}$ above-normal nationwide.
- The monthly average amount of precipitation ( 1622.6 mm ) was $124 \%$ of normal, making it the fifth highest rainfall on record (period of record 1973-2011).
- The monthly average of rainy days ( 113.0 days) was 9.5 days more than that of the normal.
- The monthly average of sunshine duration (2098.9 hours) was $96 \%$ of normal.
o Seoul
- The mean temperature $\left(12.0{ }^{\circ} \mathrm{C}\right)$, the mean maximum temperature $\left(16.4{ }^{\circ} \mathrm{C}\right)$ and the mean minimum temperature $\left(8.6{ }^{\circ} \mathrm{C}\right)$ were $0.5{ }^{\circ} \mathrm{C}, 0.6{ }^{\circ} \mathrm{C}$ and $0.2{ }^{\circ} \mathrm{C}$ below-normal, respectively.
- The monthly amount of precipitation ( 2039.3 mm ) was $141 \%$ of normal, making it the fifth highest rainfall on record (period of record 1908-2011).
- The number of rainy days ( 108.0 days) was 0.9 days smaller than that of normal.
- The total of sunshine duration (2073.8 hours) was $100 \%$ of normal.

## $\square$ Long-term December and Annual climate trends

o The mean temperatures for December and annual 2000's in Korea were $0.5^{\circ} \mathrm{C}$, $0.7^{\circ} \mathrm{C}$ higher compared with the 1970 's, exhibiting an upward trend.
o For Seoul, the mean minimum temperature of December 2000's were $3.2{ }^{\circ} \mathrm{C}$ and $0.6{ }^{\circ} \mathrm{C}$ higher than those of the 1920 s and 1970 s , respectively.
o The precipitation amounts for December 2000's in Korea was ( 5.7 mm ) less than the corresponding values for the 1970's. but annual was ( 148.9 mm ) more than the corresponding values for the 1970's.
※ 1970's: average from 1973 to 1980
※ 2000's: average from 2001 to 2010

## Appendix 1. Additional Climate Summary in December 2011
