Monthly (May) and Seasonal (Spring : March - May) 2014 Climate Summary $\diamond$ The mean temperature $\left(18.4{ }^{\circ} \mathrm{C}\right)$ for May 2014 nationwide was the highest in a record extending back to 1973 and the monthly amount of precipitation ( 56.2 mm ) was $51.6 \%$ of normal
$\diamond$ The mean temperature ( $13.1{ }^{\circ} \mathrm{C}$ ) for Spring 2014 nationwide was the second highest in a record extending back to 1973 and the precipitation ( 215.9 mm ) was $90.3 \%$ of normal
$\square$ Climate features and long-term trends in May and Spring 2014 have been analyzed with the data collected at the 45 meteorological stations throughout Korea (national average) from 1973 to 2014 (1908-2014 for Seoul).
※ Normal : Average value of climatic element data collected from 1981 to 2010
$\square$ The climatic characteristics in May 2014 are described as follows:
o For Korea (whole country),

- The mean temperature $\left(18.4{ }^{\circ} \mathrm{C}\right)$, the mean maximum temperature $\left(25.0{ }^{\circ} \mathrm{C}\right)$ and the mean minimum temperature $\left(12.1{ }^{\circ} \mathrm{C}\right)$ were $1.2{ }^{\circ} \mathrm{C}, 1.7{ }^{\circ} \mathrm{C}, 0.6{ }^{\circ} \mathrm{C}$ above normals, respectively.
- The mean temperature was the highest and the maximum temperature was the second highest in a record extending back to 1973.
- The nationally-averaged precipitation was 56.2 mm , which was $51.6 \%$ of normal. The number of the days of rain was 7.6 days, which was 1.0 days less than normal.
- The total number of the hours of sunshine was 287.6 hours, which was $129.6 \%$ of normal and the highest in a record extending back to 1973.
o For Seoul,
- The mean temperature $\left(18.9{ }^{\circ} \mathrm{C}\right)$, the mean maximum temperature $\left(25.3{ }^{\circ} \mathrm{C}\right)$, the mean minimum temperature $\left(13.8{ }^{\circ} \mathrm{C}\right)$ were $1.1{ }^{\circ} \mathrm{C}, 2.3{ }^{\circ} \mathrm{C}, 0.6{ }^{\circ} \mathrm{C}$ above normals, respectively.
- The mean maximum temperature was the second highest in a record extending back to 1908.
- The amount of precipitation was 63.0 mm , which was $59.5 \%$ of normal.
- The number of the days of rain was 9.0 days, which was same as normal.
- The total number of the hours of sunshine was 304.0 hours, which was $142.7 \%$ of normal.

## Long-term trend in May 2014 climate

o For Korea (whole country),

- The national mean temperatures in May 2000s (2001-2010) is $0.7{ }^{\circ} \mathrm{C}$ above those of the same month in 1970s.
- The nationally-averaged precipitation in May 2000s (2001-2010) is 9.2 mm more than that of the same month in 1970s.
- The number of the days of rain in May 2000s are 0.9 days more than those of the same month in 1970s.
- The total sunshine in May 2000s (2001-2010) is 34.3 hours less than that of the same month in 1970s.
o For Seoul,
- The mean temperatures in May 2000s (2001-2010) are $1.4{ }^{\circ} \mathrm{C}$ above those of the same month in 1970s.
- The precipitation in May 2000s (2001-2010) is 10.9 mm more than that of the same month in 1970s.
- The number of the days of rain in May 2000s are 0.7 days more than those of the same month in 1970s.
- The total sunshine in May 2000s (2001-2010) is 33.8 hours less than that of the same month in 1970s.

## The climatological characteristics in Spring can be described as follows:

o For Korea (whole nation),

- The mean temperature $\left(13.1{ }^{\circ} \mathrm{C}\right)$ and the mean maximum temperature $\left(19.5{ }^{\circ} \mathrm{C}\right)$ the mean minimum temperature $\left(7.3{ }^{\circ} \mathrm{C}\right)$ and were higher than normals $1.4{ }^{\circ} \mathrm{C}$, $1.6{ }^{\circ} \mathrm{C}, 1.3{ }^{\circ} \mathrm{C}$, respectively.
- The mean maximum temperature was the highest and mean temperature and the mean minimum temperature were the second highest in a record extending back to 1973.
- The nationally-averaged precipitation was 215.9 mm , which was $90.3 \%$ above normal. The days of rain were 24.4 days, which were 0.1 days less normal.
- Total hours of sunshine were 712.2 hours, which was $113.1 \%$ above normal.
o For Seoul,
- The mean temperature $\left(13.6{ }^{\circ} \mathrm{C}\right)$ and the mean maximum temperature $\left(19.3{ }^{\circ} \mathrm{C}\right)$ and the mean minimum temperature $\left(8.9{ }^{\circ} \mathrm{C}\right)$ were lower than normals $1.6{ }^{\circ} \mathrm{C}$, $2.2{ }^{\circ} \mathrm{C}, 1.4{ }^{\circ} \mathrm{C}$, respectively.
- The mean maximum temperature was the highest and mean temperature and the mean minimum temperature were the second highest in a record extending back to 1908 .
- The amount of precipitation was 101.2 mm , which was $46.5 \%$ less than normal. The days of rain were 20.0 days, which were 4.3 days less than normal.
- Total hours of sunshine were 731.9 hours, which were $120.6 \%$ above normal.

## Long-term trend of Spring 2014 climate

o For Korea (whole country),

- The national mean temperatures in Spring 2000s (2001-2010) is $0.7{ }^{\circ} \mathrm{C}$ above those of the same season in 1970s.
- The nationally-averaged precipitation in Spring 2000s (2001-2010) is 35.9 mm less than that of the same season in 1970s.
- The number of the days of rain in Spring 2000s are 0.9 days more than those of the same season in 1970s.
- The total sunshine in Spring 2000s (2001-2010) is 57.1 hours less than that of the same season in 1970s.
o For Seoul,
- The mean temperatures in Spring 2000s (2001-2010) are $1.2{ }^{\circ} \mathrm{C}$ above those of the same season in 1970s.
- The precipitation in Spring 2000s (2001-2010) is 22.5 mm less than that of the same season in 1970s.
- The number of the days of rain in Spring 2000s are 2.0 days more than those of the same season in 1970s.
- The total sunshine in Spring 2000s (2001-2010) is 76.2 hours less than that of the same season in 1970s.

## Remarks

|  | temperature difference between the normal temperature $\left({ }^{\circ} \mathrm{C}\right)$ |  | precipitation ratio of the normal precipitation (\%) |  |
| :---: | :---: | :---: | :---: | :---: |
|  | ten-day | month | ten-day | month |
| above(more) | $>0.7$ | $>0.5$ | >130 | >120 |
| nearly | -0.7~0.7 | -0.5~0.5 | 50~130 | 70~120 |
| below(less) | <-0.7 | <-0.5 | <50 | <70 |
