May 2015 and Spring(March-May) 2015 Climate Summary
The nationwide mean temperature in May 2015 was $18.6{ }^{\circ} \mathrm{C}, 1.4^{\circ} \mathrm{C}$ above normal and the nationally-averaged precipitation ( 56.5 mm ) was $50.6 \%$ of normal.

The nationwide mean temperature in Spring 2015 was $12.7{ }^{\circ} \mathrm{C}, 1.0^{\circ} \mathrm{C}$ above normal and the nationally-averaged precipitation ( 223.1 mm ) was $88.9 \%$ of normal.
$\square$ Climate features and long-term trends in May 2015 and Spring 2015 were analyzed with the data collected at the 45 meteorological stations throughout Korea (national average) from 1973 to 2015 (1908-2015 for Seoul).
※ Normal : Average value of climatic element data collected from 1981 to 2010
$\square$ The climatic characteristics in May 2015
o Korea (as a whole),

- The mean temperature $\left(18.6{ }^{\circ} \mathrm{C}\right)$, the mean maximum temperature $\left(25.1^{\circ} \mathrm{C}\right)$ and the mean minimum temperature $\left(12.3{ }^{\circ} \mathrm{C}\right)$ were $1.4{ }^{\circ} \mathrm{C}, 1.8^{\circ} \mathrm{C}, 0.8^{\circ} \mathrm{C}$ above normal, respectively.
- The nationally-averaged precipitation was 56.5 mm , which was $50.6 \%$ of normal. The number of rainy days was 6.6 , which was 2.0 days less than normal.
- The total number of hours of sunshine was 284.9 , which was $128.4 \%$ of normal.
o Seoul,
- The mean temperature $\left(18.9{ }^{\circ} \mathrm{C}\right)$, the mean maximum temperature $\left(24.9{ }^{\circ} \mathrm{C}\right)$, the mean minimum temperature $\left(13.6{ }^{\circ} \mathrm{C}\right)$ were $1.1^{\circ} \mathrm{C}, 1.9^{\circ} \mathrm{C}, 0.4^{\circ} \mathrm{C}$ above normal, respectively.
- The amount of precipitation was 28.9 mm , which was $27.3 \%$ of normal.
- The number of rainy days was 6.0 , which was 3.0 days less than normal.
- The total number of hours of sunshine was 290.4 , which was $136.3 \%$ of normal.

## Long-term ${ }^{1)}$ trend in May 2015 climate

o Korea (as a whole),

- The national mean temperatures in May in the 2000s (2001-2010) was $0.7{ }^{\circ} \mathrm{C}$ above that of in the 1970s (1973-1980).
- The nationally-averaged precipitation in May in the 2000 s was 9.2 mm more than that of in the 1970s.
- The number of rainy days in May in the 2000s was 0.9 days more than that of in the 1970s.
- The total sunshine hours in May in the 2000s was 34.3 hours less than that of in the 1970s.
o Seoul,
- The mean temperatures in May in the 2000s (2001-2010) was $1.4{ }^{\circ} \mathrm{C}$ above that of in the 1970s (1971-1980).
- The precipitation in May in the 2000s was 10.9 mm more than that of in the 1970 s .
- The number of rainy days in May in the 2000 s was 0.7 days more than that of in the 1970s.
- The total sunshine hours in May in the 2000s was 33.8 hours less than that of in the 1970s.

## $\square$ The climatic characteristics in Spring 2015

o Korea (as a whole),

- The mean temperature $\left(12.7{ }^{\circ} \mathrm{C}\right)$, the mean maximum temperature $\left(19.1{ }^{\circ} \mathrm{C}\right)$ and the mean minimum temperature $\left(6.7{ }^{\circ} \mathrm{C}\right)$ were $1.0^{\circ} \mathrm{C}, 1.2{ }^{\circ} \mathrm{C}, \quad 0.7^{\circ} \mathrm{C}$ above normal, respectively.
- The nationally-averaged precipitation was 223.1 mm , which was $88.9 \%$ of normal. The number of rainy days was 25.9 , which was 1.4 days more than normal.
- The total number of hours of sunshine was 737.8 , which was $117.2 \%$ of normal.
o Seoul,
- The mean temperature $\left(12.8^{\circ} \mathrm{C}\right)$, the mean maximum temperature $\left(18.7^{\circ} \mathrm{C}\right)$ and the mean minimum temperature $\left(7.7^{\circ} \mathrm{C}\right)$ were $0.8^{\circ} \mathrm{C}, 1.6{ }^{\circ} \mathrm{C}, 0.2^{\circ} \mathrm{C}$ above normal, respectively.
- The amount of precipitation was 119.0 mm , which was $54.7 \%$ of normal.
- The number of rainy days was 21.0 , which was 3.3 days less than normal.
- The total number of hours of sunshine was 777.2 , which was $128.0 \%$ of normal.

## Long-term²) trend in Spring 2015 climate

o Korea (as a whole),

- The national mean temperatures in Spring in the 2000s (2001-2010) was $0.7^{\circ} \mathrm{C}$ above that of in the 1970s (1973-1980).
- The nationally-averaged precipitation in Spring in the 2000s was 35.9 mm less than that of in the 1970s.
- The number of rainy days in Spring in the 2000s was 0.9 days more than that of in the 1970s.
- The total sunshine hours in Spring in the 2000s was 57.1 hours less than that of in the 1970s.
o Seoul,
- The mean temperatures in Spring in the 2000s (2001-2010) was $1.2{ }^{\circ} \mathrm{C}$ above that of in the 1970s (1971-1980).
- The precipitation in Spring in the 2000s was 22.5 mm less than that of in the 1970 s .
- The number of rainy days in Spring in the 2000s was 2.0 days more than that of in the 1970s.
- The total sunshine hours in Spring in the 2000s was 76.2 hours less than that of in the 1970s.

## Appendix 1 Climate features of May 2015 (Nationwide)

Fig 1. Temperatures (mean, mean maximum and mean minimum) and precipitation in South Korea during May (1973-2015).
